

BMH TECHNOLOGY

LIFECYCLE SERVICES

TRUSTED PARTNER FROM THE FIRST STEP

BMH Service provides a large scale of services and know-how from preventive maintenance to modernization of lines.

As a partner, we can provide service concepts, which maximize the return on your investment throughout the equipment's lifecycle. You can focus on your core business.

We step in the project already when the BMH Project Sales is preparing a quotation for you. This reflects our commitment to your project for its entire lifecycle. Our dedicated partnership will reward you with profitable operation, high capacity and a long lifecycle.

BMH Service's established local maintenance networks guarantee fast response and actions when needed.

Remote control solutions and local maintenance networks minimize interruptions in operation. From the remote control system we can provide visualized on-line usage reports, which give useful information for your production management.

We have valuable background information about industrial processes and equipment lifecycles.

With over 60 years in the field, we have learnt how various materials with specific characteristics behave in customer's handling processes.

Based on our specialized experience and know-how we can offer you tailored solutions to your specific needs to keep your production running. This is real added value.

The continuous process running is our top priority.

"Partnership is the key to success."

Magnus Bernroth of Mälarenergi AB visited BMH Workshop in Rauma and was happy with the spare parts for their annual overhaul under construction.

AVAILA- BILITY IS KING

BMH Technology Oy specialises in turnkey deliveries of SRF (Solid Recovered Fuel) production plants and solid fuel handling systems for power plants and cement kilns. We do it all: design, build, install, service.

We have the latest technology to meet the increasing demands for quality and availability, and for environmental, operational and maintenance requirements.

Delivery of comprehensive turnkey installations worldwide is guaranteed by our experience and know-how. We manufacture all key equipment, like big shredders, separation equipment, screw reclaimers, etc. in our big, modern, well-equipped workshops. This means high quality and reliable delivery times.
