

TYRANNOSAURUS® series

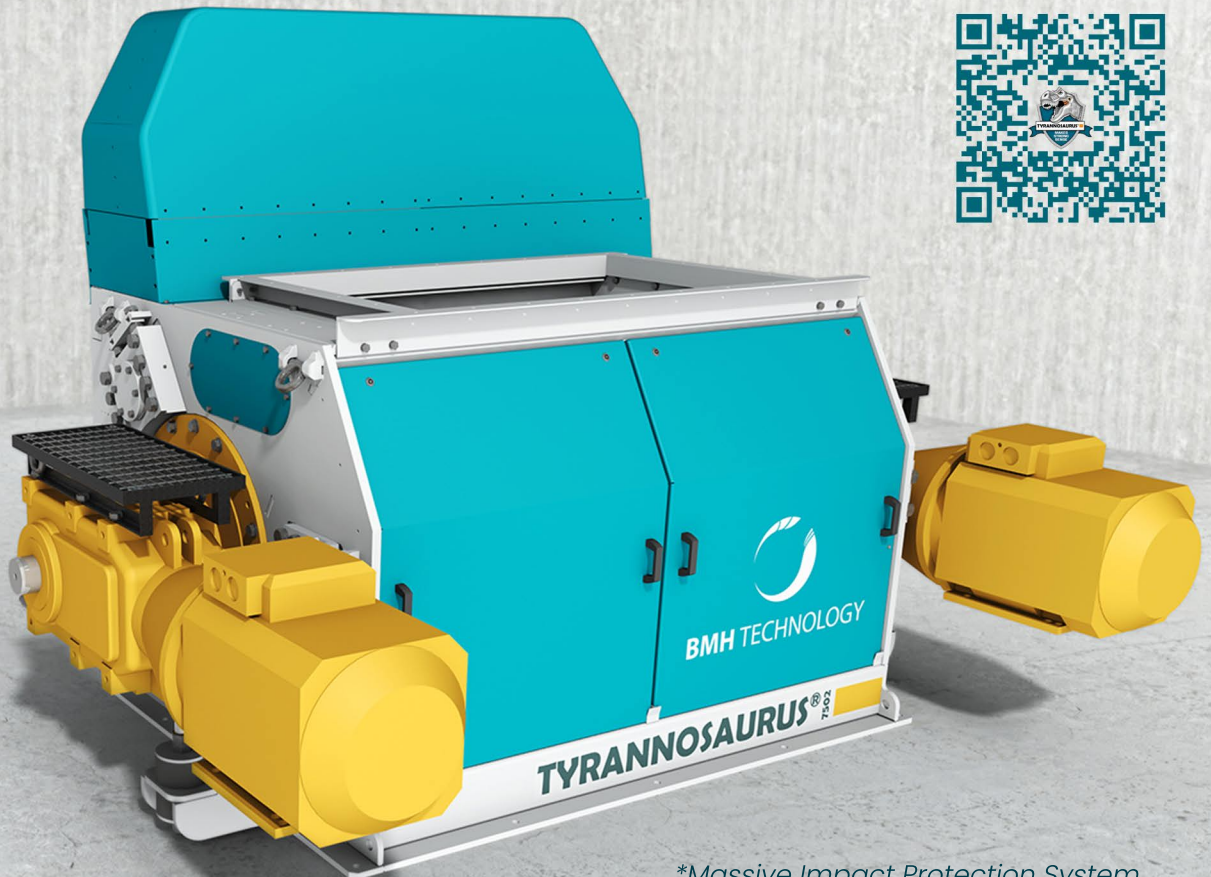

T750X

T750X SERIES is a medium speed single-rotor shredder suitable for **ICW**, such as wood, textile, cardboard and plastics.

It's ideally used at Solid Recovered Fuel preparation plants or for fuel quality control by SRF end-users.

The T750X series has proven itself as a **reliable shredder** - we've seen them operating consistently for more than ten years.

They are designed for a long lifecycle and equipped with semi-automatic **MIPS®*** and **ZeroGap®** technology.

Say hello to flexibility

1

THE COUNTER KNIVES are held in position hydraulically by semi-automatic **MIPS®**, which protects the T750X from unshreddable items.

2

THE KNIFE GAP can be adjusted to zero by **ZeroGap®** technology, which maximizes the shredding capacity.

3

THE SCREEN MODEL can be selected according to the output particle size requirement.

4

LARGE MAINTENANCE DOORS provide easy access to the screens and knives. The knives and counter knives are easy and fast to replace, which enables maximum uptime.

T750X series / Technical details

MODEL _____ T7502

MAIN DIMENSIONS (L x W x H), mm 3700 x 2700 x 2200

WEIGHT (T) 11,1

DRIVE POWER (kW) 2 x 55

INFEED OPENING (mm) 970 X 1600

ROTOR LENGTH (mm) 1600

ROTOR DIAMETER (mm) 770

ROTATION SPEED (RPM, MAX) 100

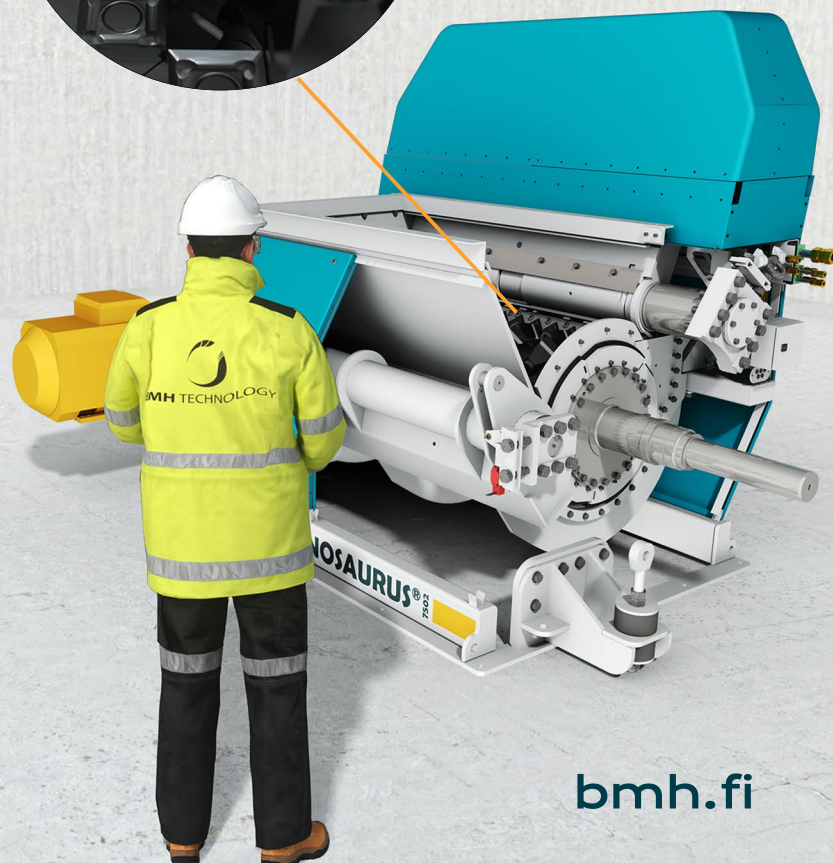

ROTOR KNIVES (PCS) 52

KNIFE SIZE (mm) 94 X 94

IMPACT PROTECTION MIPS®, semi-auto

CAPACITY (m³/h) up to 100

TYPICAL OUTPUT PARTICLE SIZE (mm) 40-70*

*Depends on the screen hole size.
